IT SECURITY AT

Syntetisk admin kunde

e2e-admin-0b3f511e-55c5-481a-8522-38edf35a5356-report · closed 16 October 2026

Zone	Average score	Critical share	Responses
Yellow	0.65 of 3	21%	6

Each answer scores 0–3: green 0, yellow 1, orange 2 and red 3. The average score is the mean of these points, and the critical share is the share of answers that are orange or red. Lower is better.

What you should address

1. **4 of 6** do not use MFA or do not know whether they do HIGH
2. **4 of 6** do not have a password manager HIGH
3. **2 of 6** do not know how or whom to notify about suspicious emails HIGH

What we suggest

1. Check Entra for people without MFA and enable it for everyone. Show what the approval looks like.
2. Pilot Bitwarden with 2–3 people, then the rest.
3. One page on the wall and in Teams: whom to call and what to do with the email. The leader explains it at the next meeting.

Compared with e2e-admin-0b3f511e-55c5-481a-8522-38edf35a5356-baseline

	Before	Now	Change
Average score	0.00	0.65	+0.65, worse
Critical share	0%	21%	+21 percentage points, worse
Zone	Green	Yellow	

The questions and answer options are the same, but the comparison is approximate: the people who answered are not necessarily the same, and the number of answers differs (3 before, 6 now).

About the numbers

The numbers combine the employees' answers. We only show numbers based on at least three answers, and we hide groups that could reveal the answers of fewer than three people. The report contains no names or initials and no individual answers, and the leaders' answers are not included.

Question by question

Question	Zone	Average score	Critical share	Previous round
Do you feel the company has a clear focus on IT security in everyday work?	Green	0.50	0%	–
Have you experienced attempts at fraud or hacking by email, phone (e.g. scam calls) or SMS?	–	–	–	–
Are there established routines for what to do to stop an IT incident from spreading (e.g. disconnect from the network, alert the right person)?	Yellow	0.67	33%	0.00
Are there routines for how the company gets going again after a serious IT incident (who does what, in which order, communication)?	–	–	–	–
Do you feel you have good password habits (not sharing, strong passwords, not writing them down where they can be seen)?	–	–	–	–
Do you use the same password for several services (work and/or private)?	Green	0.00	0%	0.00
Do you use a password manager (e.g. Bitwarden, 1Password or similar)?	Yellow	1.33	67%	–
Do you lock your computer (Win + L) when you leave your desk?	–	–	–	–
Have you had training in how to spot phishing or fraud attempts?	–	–	–	–
Do you know how, and to whom, to report suspicious emails or messages?	Green	0.33	0%	0.00
Have you ever suspected afterwards that you may have clicked a link or attachment that was a scam?	–	–	–	–
Do you use two-factor authentication (MFA) when logging in to work systems?	Yellow	1.33	67%	0.00
Do you know where work data should be saved to be sure it is backed up?	Yellow	1.00	0%	–
Do you often save important work files locally on the PC (Desktop/Documents) instead of OneDrive/SharePoint?	–	–	–	–
Do you feel your PC is regularly updated with the latest security and software updates?	–	–	–	–
Do you know whether your PC has antivirus/EDR or other security software installed and active?	Green	0.00	0%	–

– means there are too few answers to show the number.
